

Call Center & Central Concierge Panel Walkthrough

Complete PRD Requirements Traceability, 7-Pillar Telephony Architecture & Implementation Walkthrough

Executive Summary & Central Concierge Authority

The **Call Center & Central Concierge Desk** operates as an **Admin / Head Office level multi-branch command center**. Rather than individual salon branch floor staff answering phone inquiries during peak rush hours, central concierge agents handle inbound calls via WebRTC/SIP cloud telephony (Exotel/Twilio), perform instant CTI Caller ID lookups for VIP dossiers and allergy warnings, dispatch conflict-free bookings across all 5 branches (Mumbai, Delhi, Bangalore, Hyderabad, Bhiwandi), manage 5-stage customer grievances, and drive automated lapsed client rebooking campaigns.

1. Official PRD Requirements Traceability Matrix

PRD Requirement ID	Feature Name	Product Requirement Description	Implementation Details in Code
SALO-PRD-CC-001	CTI Telephony Screen-Pop & Agent State	Persistent CTI bar with real-time agent presence (Available, On Call, Wrap-Up, Break, Offline), SIP extension tracking, and instant caller ID screen-pop trigger.	Implemented in <code>CallCenterCTIBar.tsx</code> & <code>CallCenterBranchContext.tsx</code> . Supports 1-click VIP call simulation.
SALO-PRD-CC-002	Inbound Caller 360° CRM Dossier	Instant pop-up modal on incoming call showing VIP Tier, Prepaid Wallet balance, Home Branch, Preferred Stylist, Lifetime Spend, and Critical Scalp Allergies.	Built in <code>InboundCallerScreenPopModal.tsx</code> . Features direct booking dispatch, WhatsApp price card trigger, and grievance ticket escalation.
SALO-PRD-CC-003	Cross-Branch Booking Dispatch Engine	Unified multi-branch appointment calendar dispatch across all 5 outlets with specialist availability, conflict-free chair slots, and advance payment link generation.	Implemented in <code>AppointmentsPage.tsx</code> . Includes active client waitlist fill desk and instant WhatsApp confirmation triggers.
SALO-PRD-CC-004	Appointment Confirmations & No-Show Guard	24-hour next-day appointment confirmation queue with 1-click status actions (Confirm, Reschedule, Cancel, No-Show Warning) and WhatsApp reminder dispatch.	Built in <code>ConfirmationsPage.tsx</code> . Filters pending vs confirmed rosters with multi-branch scope support.
SALO-PRD-CC-005	Telephony Call Logs & Audio Recordings	Central cloud telephony audit ledger with S3 audio playback player, call duration (AHT), gateway session ID, and mandatory call intent disposition codes.	Implemented in <code>CallLogsPage.tsx</code> . Supports in-browser playback, disposition filtering, and modal call transcripts.
SALO-PRD-CC-006	Customer Grievance & SLA Redressal	5-stage customer ticket resolution workflow (Open $\rightarrow$ Investigation $\rightarrow$ Escalated $\rightarrow$ Resolved $\rightarrow$ Closed) with goodwill wallet credit compensation.	Implemented in <code>SupportTicketsPage.tsx</code> . Features digital salon wallet goodwill payout modal.
SALO-PRD-CC-007	Lost Client Recovery & Retention Campaigns	Automated churn detection for guests inactive >45 days with personalized promo voucher codes (e.g. REVIVE20) and 1-click predictive dialer.	Built in <code>LostClientRecoveryPage.tsx</code> . Tracks recovered client counts and generated win-back revenue.

PRD REQUIREMENT ID	FEATURE NAME	PRODUCT REQUIREMENT DESCRIPTION	IMPLEMENTATION DETAILS IN CODE
SALO-PRD-CC-008	Concierge Package & Membership Sales	Multi-location beauty bundle packages, annual VIP club memberships, and gift vouchers with instant Razorpay/UPI payment link dispatch.	Implemented in SalesPackagesPage.tsx. Supports cross-branch redemption rules.

2. Business Rationale & Why We Implemented Everything

Operational Excellence in Luxury Salon Chains

Field-by-field and module-by-module explanation of the business impact delivered by the Central Concierge architecture:

- **Why Central Concierge Authority?** In high-end salon chains, front-desk receptionists are frequently overwhelmed by walk-in welcomes, retail checkouts, and credit card POS settlements. Centralizing telephony guarantees that 100% of inbound booking calls are answered professionally within 2 rings with zero missed revenue.
- **Why CTI Screen-Pop with Chemical Allergy Alerts?** Scalp contraindications (e.g., Ammonia sensitivity, nut-oil allergies) are major liability risks. Displaying allergy warnings instantly when the guest dials in ensures agents book the correct organic services and assign certified colorists.
- **Why Cross-Branch Capacity Balancing?** When a guest's primary salon (e.g. Bandra West) has no open chairs at 4 PM on Saturday, the agent can immediately cross-book them at a nearby sister salon (e.g. Juhu or Worli) rather than losing the booking to a competitor.
- **Why Goodwill Wallet Compensation in Grievance Redressal?** Customer retention is 5x cheaper than acquisition. Empowering call center managers to instantly credit ₹500–₹1,500 into the guest's salon wallet directly recovers dissatisfied clients before negative online reviews are posted.
- **Why Automated Lapsed Client Recovery?** Guests who have not visited in 45–90 days represent untapped pipeline. Triggering personalized promotional vouchers (‘REVIVE20’) drives consistent month-on-month win-back revenue.

3. UI Architecture & Page Flow

Component / Page	UI Flow & Interactive Behavior	State & Context Binding
Call Center Sidebar	Multi-branch scope popover switcher, seamless curved active tabs (sidebar-active-cutout), clean uppercase headers, and bottom-sticking agent profile.	Bound to CallCenterBranchContext.tsx with dynamic branch switching across 5 salon outlets.
Persistent CTI Bar	Top toolbar with presence toggle (Available, On Call, Wrap-Up, Break), handled metrics ticker, and "Simulate Inbound VIP Call" trigger button.	Controls activeCall state in context, opening the 360° screen-pop modal.
Dashboard Command Center	5 dynamic KPI cards, live incoming lead queue table, agent daily target progress meter, and urgent call reminders.	Filters all lead tables and reminder queues strictly by selected branch.
Grievance Redressal Desk	5-stage visual SLA pipeline, ticket creation modal, priority tags, and digital wallet compensation credit modal.	Updates ticket lifecycle from Open to Resolved with goodwill credit balance updates.
Telephony Call Audio Logs	Universal audit ledger with in-browser audio player, call duration, gateway SID, and call intent disposition breakdown.	Plays simulated S3 audio recordings with full call transcript modal inspection.
