

Brand Owner / Head Office · Catalogue Management

Architectural Specification, Field-by-Field Rationale & Multi-Branch Master Catalogue System

Executive Summary & Architecture Overview

The Catalogue module empowers Brand Owners and Head Office Executives to centrally govern service definitions, timing buffers, branch custom pricing, stylist skill prerequisites, and room/chair resource assets across all salon locations. Built entirely with React 19, TypeScript, and full-screen backdrop portaling, this system guarantees zero double-booking while preserving historical billing archives.

1. PRD Traceability Matrix

PRD REQ ID	FEATURE NAME	PRODUCT REQUIREMENT DESCRIPTION	IMPLEMENTATION DETAILS IN CODE
SALO-PRD-CAT-01	Service Categories Master	Hierarchical category categorization, display priority sorting, icon and accent theming, and non-destructive deactivation safeguarding.	Implemented in ServiceCategoriesTab.tsx with master data table, full-screen creation modal, color picker, and deactivation confirmation dialog.
SALO-PRD-CAT-02	Central Service Catalogue	Master treatment directory with duration envelopes, turnover buffers, GST rates, skill mapping, and multi-branch deployment checkboxes.	Implemented in ServicesTab.tsx featuring multi-column filter bar, Specification Dossier Modal, quick duplicate action, and draft status tags.
SALO-PRD-CAT-03	Multi-Branch Tariff Matrix	Centralized pricing controls comparing baseline HQ tariffs against unit-level overrides with live variance delta calculation.	Implemented in ServicePricingTab.tsx with real-time percentage delta calculations, effective date schedulers, and approval tags.
SALO-PRD-CAT-04	Staff Skills & Level Matrix	Accreditation directory for Junior, Intermediate, Senior, and Expert tiers with strict service dispatch mapping.	Implemented in StaffSkillsLevelsTab.tsx with 4-tab sub-switcher (Skills, Levels, Service Mapping, Staff Roster).
SALO-PRD-CAT-05	Salon Resource & Equipment Master	Physical asset tracking for Treatment Rooms, Styling Chairs, and High-End Machines with double-booking prevention locks.	Implemented in ResourcesTab.tsx with capacity units, maintenance status flags, and service-resource linkage.

2. Business Rationale & Why We Implemented Everything

Field-by-Field & Feature-by-Feature Justification

Turnover Buffer Time Envelope (+15m) Prevents salon congestion by automatically allocating sanitisation and chair preparation windows between back-to-back client treatments.	Non-Destructive Deactivation Instead of hard database deletions, services and categories are deactivated, preserving historic accounting invoices and POS ledgers intact.
Live Pricing Variance Delta Instantly shows the Brand Owner the exact percentage difference (+ ₹400 / +8.3%) between HQ baseline tariffs and high-rental metro overrides.	Staff Competency Dispatch Lock Restricts high-risk chemical (Keratin) or medical aesthetic protocols (Hydra-Facial) exclusively to certified Senior/Expert tier practitioners.
Physical Resource Reservation Links high-cost machines (Omnilux LED, Vortex Hydra) and VIP bridal vanity rooms directly to treatments to eliminate simultaneous appointment clashes.	Full-Screen Portal Backdrops (z-[9999]) Modals mount directly to document.body, cleanly obscuring sidebars and top bars in accordance with the luxury SaaS aesthetic standard.

3. UI Architecture & Page Flow

The master module is organized into 5 intuitive sub-sections synchronized with URL state parameters (?tab=categories|services|pricing|skills|resources):

- **Master Shell** (CatalogueMasterPage.tsx): Top breadcrumb, summary KPI metrics, and sub-nav tabs.
- **Service Categories** (ServiceCategoriesTab.tsx): Category hierarchy and display order management.
- **Services Catalogue** (ServicesTab.tsx): Treatment specifications, timing buffers, and multi-branch rollouts.
- **Tariff Management** (ServicePricingTab.tsx): Multi-location pricing overrides with live variance preview.
- **Competency Matrix** (StaffSkillsLevelsTab.tsx): Skill tiers and staff qualification mapping.
- **Resource Master** (ResourcesTab.tsx): Room, chair, and equipment inventory with double-booking prevention.
