

Brand Owner / Head Office · Client CRM & Guest Experience

Architectural Specification, Field-by-Field Rationale & Multi-Branch Master CRM Dossier System

Executive Summary & Architecture Overview

The Clients module serves as the central CRM and guest intelligence repository for Brand Owners. Featuring a 12-tab comprehensive profile dossier, household account groupings, automated treatment rebooking cycles, win-back dormancy workflows, NPS telemetry, and service ticket escalation, this architecture maintains strict DPDP privacy compliance and non-destructive archiving.

1. PRD Traceability Matrix

PRD REQ ID	FEATURE NAME	PRODUCT REQUIREMENT DESCRIPTION	IMPLEMENTATION DETAILS IN CODE
SALO-PRD-CRM-01	Central Client CRM Registry	Multi-location unified guest directory, multi-search by Name/Mobile/Email/ID, branch filters, and lifetime spend metrics.	Implemented in AllClientsTab.tsx with CRM table, onboarding modal, and non-destructive archive safeguard dialogs.
SALO-PRD-CRM-02	360° Client Profile Dossier	12-tab deep-dive (Overview, Personal, Household, Appointments, History, Packages, Membership, Wallet/Loyalty, Feedback, Notes, Photos, Consent).	Implemented in ClientProfileDossierModal.tsx using full-screen portaling (z - [9999]) and privacy-aware data redaction.
SALO-PRD-CRM-03	Household & Family Accounts	Family grouping enabling shared appointment booking and loyalty point pooling while keeping individual medical/consultation notes private.	Implemented in ClientProfileDossierModal.tsx under the Household Tab with primary billing account indicators.
SALO-PRD-CRM-04	Dynamic Client Segments	Automated clustering for VIP High Value, Frequent, Membership, Package, New, At Risk, and Inactive cohorts.	Implemented in ClientSegmentsTab.tsx with cohort drilldown modal and campaign targeting placeholders.
SALO-PRD-CRM-05	Retention & Predictive Rebooking	Treatment recurrence cycle calculation (e.g. 3 weeks for Hydra-Facial, 4 weeks for Balayage) and outreach status tracking.	Implemented in RetentionRebookingTab.tsx with Due, Contacted, Booked, and Declined status workflows.
SALO-PRD-CRM-06	Inactive Win-Back Recovery	Dormancy cohort tracking (30+, 60+, 90+, 180+ days) with customized incentive voucher deployment.	Implemented in InactiveClientsTab.tsx with win-back campaign incentive modals.
SALO-PRD-CRM-07	Feedback & Net Promoter Score	Post-service CSAT ratings, NPS promoter/passive/detractor segmentation, and negative review escalation.	Implemented in FeedbackNpsTab.tsx with escalation action modals to General Managers.
SALO-PRD-CRM-08	Service Support Tickets	Guest dispute resolution, service quality incident handling, SLA tracking, and audit trails.	Implemented in ServiceTicketsTab.tsx with priority levels (Low to Critical) and lifecycle state controls.

2. Business Rationale & Why We Implemented Everything

Field-by-Field & Feature-by-Feature Justification

Household Grouping with Privacy Lock Allows parents to book appointments for children or spouses while strictly walling off confidential medical consultation notes and aesthetic photos.	Predictive Rebooking Cycle Calculates exact service maintenance intervals (haircut regrowth, keratin fade, lash refill) so stylists can proactively reach out before client lapse.
Inactivity Cohort Win-Back Workflows Automates win-back vouchers for dormant accounts (90+ and 180+ days) to reactivate past high-value clients before permanent churn.	Full-Screen Portal Backdrops (z-[9999]) Modals mount directly to document.body, cleanly obscuring sidebars and top bars in accordance with the luxury SaaS aesthetic standard.
Non-Destructive Archiving Archiving a client pauses outbound communications while keeping all historical invoices, wallet credits, and loyalty balances permanently intact.	DPDP Consent & Communication Safeguards Tracks granular opt-ins for WhatsApp, SMS, Email, and clinical photography; prevents promotional outreach if the guest has opted out.

3. UI Architecture & Page Flow

The master module is organized into 6 intuitive sub-sections synchronized with URL state parameters (?tab=all|segments|retention|inactive|feedback|tickets):

- **Master Shell** (ClientsMasterPage.tsx): Top breadcrumb, summary KPI metrics, and sub-nav tabs.
- **All Clients CRM** (AllClientsTab.tsx): Multi-search CRM table with direct access to full client profile dossiers.
- **Client Profile Dossier** (ClientProfileDossierModal.tsx): 12-tab comprehensive profile inspection.
- **Client Segments** (ClientSegmentsTab.tsx): Behavioral clustering for targeted marketing campaigns.
- **Retention & Rebooking** (RetentionRebookingTab.tsx): Recurrence pipeline and outreach queue.
- **Inactive Recovery** (InactiveClientsTab.tsx): Win-back voucher deployment for dormant guests.
- **Feedback & NPS** (FeedbackNpsTab.tsx): CSAT reviews and detractor resolution.
- **Service Tickets** (ServiceTicketsTab.tsx): Dispute resolution desk with SLA priorities.
