

Brand Owner / Head Office → Brand Settings & Governance Module

System Walkthrough, Architectural Specification & Implementation Traceability Matrix

Executive Architectural Summary: The Brand Settings module delivers centralized enterprise configuration and governance for the Brand Owner / Head Office across corporate identities, multi-location localization defaults, pricing models, GST & SAC tax configurations, cashier discount thresholds, business policies, weekly working hours, 9 system roles × 13 modules RBAC matrix, and non-destructive workflow controls. It strictly adheres to architectural boundaries, maintaining complete separation from Platform Super Admin (SaaS billing/infrastructure) and local Branch Manager operations.

1. Official PRD Traceability Matrix

Mapping all official product requirements to their concrete implementation within the codebase:

PRD REQUIREMENT ID	FEATURE NAME	PRODUCT REQUIREMENT DESCRIPTION	IMPLEMENTATION DETAILS IN CODE
SALO-PRD-094	Master Brand Profile & Identity	Legal business identity, contact leads, visual theme tokens, and GST/PAN registrations.	BrandProfileTab.tsx: Corporate entity form, color token pickers, GST verification status, and validation.
SALO-PRD-095	Locations & Localization Defaults	Default time zone, currency, Indian number formatting, date format, and branch scope matrix.	LocationsDefaultsTab.tsx: Brand defaults editor, 6-branch scope table, and portaled branch override modal.
SALO-PRD-096	Pricing Architecture & Tiers	Brand-wide master catalog vs tiered branch-specific pricing and manager overrides.	PricingTaxTab.tsx: Pricing strategy selector, branch deviation ledger, and difference variance audits.
SALO-PRD-097	Tax & SAC Code Configuration	Tax inclusive/exclusive presentation, GST 18% slab rules, and official CBIC SAC codes.	PricingTaxTab.tsx: Checkout tax mode toggle, statutory SAC mapping (999721 Hair, 999722 Beauty, 999723 Spa).
SALO-PRD-098	Cashier Discount Controls	Max self-authorized cashier discount (10%) and mandatory manager PIN threshold (>15%).	PricingTaxTab.tsx: Discount policy parameters, manager authorization triggers, and margin protection rules.
SALO-PRD-099	Operational Business Policies	8 PRD policies: Pricing, Discounts, Refunds, Packages, Memberships, Consent, No-shows, Cancellations.	PoliciesTab.tsx: Policies register, scope tags (Brand-wide vs Selected Branches), and status toggles.
SALO-PRD-100	Policy Version History Dossier	Inspection dossier displaying operating provisions and complete historical audit timeline.	PoliciesTab.tsx: Portaled dossier modal with multi-version audit table and effective date tracking.
SALO-PRD-101	Weekly Working Hours & Shifts	7-day operating hours, midday lunch break windows, and network-wide schedule sync.	WorkingHoursHolidaysTab.tsx: Day-by-day open/closed toggles, time inputs, and network sync button.
SALO-PRD-102	Holiday Calendar Management	National gazetted holidays, festive half-days, and branch blackout date controls.	WorkingHoursHolidaysTab.tsx: Holiday calendar table, status tracking, and Add Holiday portaled modal.

PRD REQUIREMENT ID	FEATURE NAME	PRODUCT REQUIREMENT DESCRIPTION	IMPLEMENTATION DETAILS IN CODE
SALO-PRD-103	Role & Permission Matrix	9 System Roles × 13 Modules × 6 Permission Types (View, Create, Edit, Delete, Approve, Export).	RolesPermissionsTab.tsx: Interactive RBAC matrix with instant toggle buttons and role switcher.
SALO-PRD-104	Role Details & Duplication	Role profile inspection dossier, user assignment counts, and 1-click clone action.	RolesPermissionsTab.tsx: Role dossier modal with module pills and duplicate role cloning engine.
SALO-PRD-105	Brand Controls & Soft-Hiding	Centralized module toggles (Appointments, Packages, Loyalty, Franchise, Home Services).	BrandControlsTab.tsx: Non-destructive workflow hiding mechanism preserving historical database records.
SALO-PRD-106	Configuration Audit Trail	Immutable log auditing material changes to pricing, discounts, permissions, and policies.	AuditHistoryTab.tsx: Read-only audit ledger tracking author, timestamp, IP address, and delta values.

2. Business Rationale & Why We Implemented Everything

A detailed rationale explaining the commercial need and architectural choices for each capability:

1. Why Centralized Brand Defaults?

Multi-unit salon enterprises operating across Indore, Bhopal, Ujjain, and Gwalior require consistent localization (Asia/Kolkata IST, Indian Lakhs/Crores, DD/MM/YYYY) without manual re-entry at each salon branch.

2. Why Dual Pricing Strategies & Deviation Matrix?

High-rent Flagship lounges (Vijay Nagar) command premium pricing (+15%), while Tier-2 express studios offer value rates. The deviation matrix allows leadership to audit checkout pricing variances in real time.

3. Why Cashier Discount Thresholds & Manager OTP?

Uncontrolled discounts are the #1 source of salon margin leakage. Restricting cashiers to 10% and requiring manager authorization for >15% prevents unapproved concessions at checkout.

4. Why 8 Explicit PRD Business Policies with Version Timelines?

Transparent policies for client consent (patch testing), chemical re-dos, package expirations, and no-shows prevent client disputes and ensure regulatory legal compliance across all franchises.

5. Why 9 Roles × 13 Modules Granular RBAC Matrix?

Front desk receptionists should book appointments and take payments but must not view payroll, edit base pricing, or export sensitive client phone rosters.

6. Why Non-Destructive Workflow Hiding?

When a tenant disables a module (e.g. Home Services or Loyalty), the PRD prohibits deleting historical invoices or records. The soft-hiding toggle hides UI surfaces while preserving historical financial integrity.

3. UI Architecture & Page Navigation Flow

The Brand Settings module is structured under a unified responsive master container with persistent sub-navigation:

- **Brand Profile (/brand-settings?tab=profile):** Master corporate entity details, visual color tokens, and statutory tax registrations.
- **Locations & Defaults (/brand-settings?tab=locations):** Regional localization settings and multi-branch configuration override modal.
- **Pricing & Tax (/brand-settings?tab=pricing):** Pricing architecture, GST 18% rules, statutory SAC mapping, and cashier discount limits.
- **Policies (/brand-settings?tab=policies):** 8 business policies register and policy dossier modal with full version history timeline.
- **Working Hours & Holidays (/brand-settings?tab=hours):** 7-day shift editor, lunch break windows, and holiday calendar scheduler.
- **Roles & Permissions (/brand-settings?tab=roles):** 9 system roles selector, 13 modules × 6 permissions interactive matrix, and role clone tool.
- **Brand Controls (/brand-settings?tab=controls):** Module toggles with non-destructive workflow soft-hiding mechanisms.
- **Change History (/brand-settings?tab=audit):** Immutable configuration change log auditing pricing, tax, and permission updates.
