

Branch Manager Workspace

Top Navigation Architecture, Front-Desk Operations & Comprehensive PRD Specification

Executive Summary

The **Branch Manager / Reception** panel has been updated from a fixed vertical sidebar to a unified **Top Navbar Layout** identical in sophistication to the Admin panel. Designed strictly around the dedicated single-branch manager persona (Indrapuri Flagship Outlet · Bhopal), the architecture consolidates brand identity and assigned location into a clean single column, streams front-desk diary operations into focused dropdowns, and eliminates unnecessary multi-branch selector bloat while maintaining 100% PRD compliance and design system reusability.

1. UI Architecture & Page Flow

BRAND & LOCATION (SINGLE COLUMN)

Combines **Atelier Brand Logo** with the active assigned outlet **Indrapuri Flagship · Bhopal**. Eliminates cross-location selector dropdowns since branch managers are strictly scoped to one branch.

FRONT DESK OPERATIONS

Integrated dropdown covering **Appointments Diary** (multi-service calendar), **Walk-ins & Live Queue** (wait time tokens), and **Client Health & Allergy Cautions** (ammonia/latex alerts).

CLIENTS & TEAM MANAGEMENT

Direct access to **Client CRM & Household Profiles**, **Stylist Rosters & Attendance**, and **Branch Service Menu** with treatment buffers and station allocations.

POS, COMMERCIAL & SHIFT CLOSURE

Covers **New POS Checkout** (instant cart billing), **Invoices & Receipts**, **Retail Shelf Stock** (low-stock alerts), and **Daily Cashier Shift Closure** with drawer cash balancing.

2. PRD Traceability Matrix (Branch Manager Role)

PRD REQUIREMENT ID	FEATURE NAME	PRODUCT REQUIREMENT DESCRIPTION	IMPLEMENTATION DETAILS IN CODE
SAL0-PR-019 SAL0-PR-023	Appointments Diary & Multi-Service Slots	Provide multi-stylist booking diary, service duration buffers, and conflict-free chair scheduling.	AppointmentsPage.tsx with timeline diary view, slot status chips, and booking modal integration.
SAL0-PR-022	Walk-in & Queue Management	Real-time walk-in token generation, automated wait time estimates, and chairside check-in.	WalkinsPage.tsx with live queue tracker, estimated wait calculation, and service assignment.
SAL0-PR-015 P-01	Client Allergy & Safety Alerts	Proactive alerts for client contraindications, patch tests, and ammonia/latex sensitivities before service.	Allergy banner in DashboardPage.tsx and notification dropdown with amber high-priority badge.

PRD REQUIREMENT ID	FEATURE NAME	PRODUCT REQUIREMENT DESCRIPTION	IMPLEMENTATION DETAILS IN CODE
SAL0-PR-042 SAL0-PR-043	Service & Retail POS Billing	Fast point-of-sale checkout, GST invoicing, split payment modes (Cash, UPI, Card), and receipt generation.	CreateInvoicePage.tsx and PaymentsPage.tsx with tax calculations and payment modals.
SAL0-PR-052 SAL0-PR-053	Daily Cashier Shift Closure	End-of-shift cash drawer balancing, digital vs cash reconciliation, and supervisor shift locking.	Cashier closure lock action in DashboardPage.tsx and shift audit reports in PaymentsPage.tsx.
SAL0-PR-065 SAL0-PR-066	Stylist Rosters & Attendance	Real-time chairside station occupancy, active shift check-ins, stylist targets, and productivity.	Resource & Chair Roster panel in DashboardPage.tsx and roster views in TeamPage.tsx.
SAL0-PR-076 SAL0-PR-086	Retail Stock & Reorder Alerts	Track branch retail shelf SKUs, consumable dispensary stocks, and threshold reorder warnings.	RetailPage.tsx with low-stock badge indicators in top navbar and notification center.
SAL0-PR-111 SAL0-PR-112	Branch Revenue & Occupancy Reports	Real-time daily collection metrics, chair occupancy percentage, no-show rates, and cashier summaries.	MetricCard telemetry grid in DashboardPage.tsx and detailed analytics in ReportsPage.tsx.

3. Business Rationale & Why We Implemented Everything

Why Single Column Brand & Branch Identifier?

Unlike the Brand Owner / Super Director (who oversees 5+ multi-city branches), a Branch General Manager is dedicated to their specific physical outlet (Indrapuri Flagship). Showing a multi-location switcher dropdown was not only redundant but confused operational accountability. Unifying the brand and outlet into a single left-hand column frees up over 200px of header space and guarantees that shift badges, notifications, and profile controls never overflow on standard 1366px laptop screens.

Why Top Navbar over Sidebar for Front Desk?

Front desk receptionists and branch managers spend 90% of their time looking at wide horizontal data structures: multi-column appointment diaries, live walk-in queue tables, and complex POS line items. A vertical sidebar permanently consumed 260px of screen real estate. The sticky Top Navbar maximizes the horizontal grid for appointment scheduling and allows rapid tab switching without vertical distraction.

Why Prominent Shift & Cashier Lock Controls?

In salon operations, cash leakage and untracked drawer discrepancies during shift handovers are major operational risks. Having the active shift badge (Shift #01 Active) directly in the header and an instant Close Cashier Shift action guarantees that drawer reconciliation happens on schedule before shift handover.
